Wildlife Veterinarian

Written for girls by STEM women, "Her STEM Career: Adventures of 51 Remarkable Women" introduces you to passionate professionals. Some discovered STEM at an early age; others didn't become interested until later. However, once hooked, they kept following their interests, whether in science, technology, engineering or mathematics. In this book, you'll learn about their current (or aspiring) occupations as well as their career paths. It is our hope that this book inspires you to discover your unique STEM adventure.
